mbud^{air}
true wireless earbuds

Contents

- Wireless earbud x 2
- On-the-go charging case x 1
- USB-C Charging cable x 1
- Rubber Ear-Tips Sizes: S/M/L x 3
- Ear-Hook loops x 2
- Standard ear loops x 2

Power On/Off:

- With MBuds seated in the case and lid open, MBuds will power ON.
- When the case is closed, MBuds will power OFF.
- MBuds can be manually powered ON/OFF by holding the MFB (Multi Function Button) for 3 seconds.

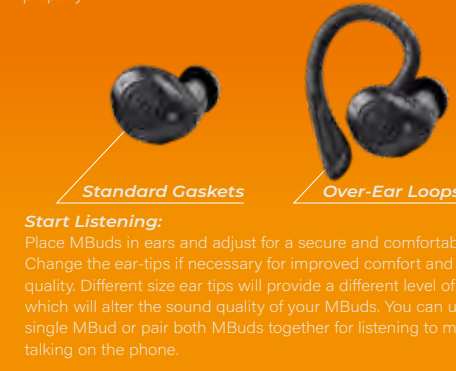

Initial Pairing To Bluetooth Device:

With MBuds seated in the case and lid open, go to the Bluetooth menu on your device and choose MBUDAIRV2. To pair to a new device you must disconnect your Bluetooth device from the MBuds and repeat the pairing process with your new device.

Find Your Fit With Different Ear-Hooks:

MBuds can be worn in two different ways. The ear loops provide a secure fit when exercising or on the go. For a traditional earbud fit, remove the ear-hooks and replace them with the included standard gaskets. Be sure to align the notch on the ear-loops with the notch on the MBuds. If the notch is not aligned properly, the MBuds will not fit in the charging case and will not be able to charge. MBuds will also not comfortably fit in your ears if the notch is not aligned properly.

Start Listening:

Place MBuds in ears and adjust for a secure and comfortable fit. Change the ear-tips if necessary for improved comfort and sound quality. Different size ear tips will provide a different level of seal which will alter the sound quality of your MBuds. You can use a single MBud or pair both MBuds together for listening to music or talking on the phone.

Charging The Case:

MBuds are charging when they are seated in the case with the lid CLOSED. To charge the case, plug the included USB-C cable into a USB charging block. The LED light on the front of the case will indicate the remaining charge level of the case in 25% increments.

To Charge The Earbud:

Red light means the earbuds are charging. When fully charged, the red light turns OFF.

Place MBuds into case. Be certain the MBuds are seated properly in the case and making contact with the charging pins. A RED led light indicates the earbuds are charging. Close the lid and allow MBuds to charge. Once the MBuds are fully charged, the LED light on the case will turn OFF.

Specification:

- Bluetooth version: BT5.0+EDR
- MBud playback time: Approximately 5.5 hours
- MBud charging time: 1.5 hours
- Charging case charging time: 1.5 hours
- MBud Battery: 3.7V/60mAh
- Charging case battery: 3.7V/800mAh

Multi Function Button Commands:

Operation	Left Earbud	Right Earbud	Scenario
